## ENTRIFLEX TECHNOLOGIES

# COMPANY PROFILE

# Introduction

## **OUR MISSION:**

*To create and sustain a culture of excellence in the delivery ICT solutions, aimed at helping our esteemed clients to cut costs and create more value; with an easier, transparent & better business processes.*

## **VISION:**

*To be the leading innovative solution provider in Africa.*

With a humble beginning in June 2018, after changing from EntriFlex Solutions Int'l Ltd. EntriFlex has remained an innovative information technology firm that provides highly qualitative, timely delivered and cost-effective IT services to a wide variety of global clients, in a wide range of creative solutions that are designed to meet specific business needs.

Our approach focuses on new ways of business, combining IT innovation and adoption while also leveraging an organization's current IT assets.

We work with global partners and new generation technology companies to build new products or services and to implement prudent business and technology strategies in today's dynamic digital environment.

We are staying on pace with the fast-evolving development tools and technologies available in the market today.

Today, EntriFlex has numerous clients which cuts across specific sectors of the economy and with proven cutting-edge solutions deployed to meeting clients' needs and improving their business operations.

## CEO REMARKS

---

"In every project, we strive to satisfy the client and develop lasting solutions, bridging the gap between challenges and success.

We don't go after we receive our cheque, we standby our clients to provide prompt support and best-practice advice services. Making sure project objective is achieve real-time.

This is the ethic that sets us apart, this is why we are EntriFlex!"

**– Kelvins Eghosa A. (CEO, EntriFlex)**

## Services: Consultancy

---

EntriFlex provides consulting services whenever you need a piece of technical advice, recommendation or assistance in solving of your problem. As a consultancy firm, we continually seeks to create value for customers by providing them with innovative solutions to varied business challenges.

Our consultants are recognized as industry thought leaders in the design, delivery and management of enterprise ICT solutions. We are able to reference major projects that have transformed the way clients exploit the power of information.

We work with international expert houses maintaining the highest degree of professionalism and confidentiality in our conduct. Our consultants enjoy vast experience in different countries around the world and aware of regional and cultural influences on business activities.

## Services: Training

---

Preparing to be certified or motivated to learn and innovate? Our ICT Services Training Team can provide standard training courses in the divers areas of Information and Communication Technology at our modern training facility based at **Eagles Management and Business School, Garki Area 11, Abuja.**

Our courses will suit **beginners:** introduction to computers, windows awareness, word processing, spread sheet, database, internet access and authoring, local area networking and related.

**To advanced and working professionals:**

Application (Mobile/Web) Development/ Programming (C, Python, PHP, Java), Development Methodologies using Agile, Web Technologies (React Js, AWS, Development Workflow), Linux and Server infrastructure Management, Sharepoint, Advanced Networking and more . We are also able to develop personalized courses.

We also management courses and training in the areas of; Human Resources, Customer Service, Working Ethics, language course (French, German, Spanish, Italian, Arabic).

Working with our certified partners, our certificates are recognized and honoured by **CMD (Center for Management Development, Abuja- Nigeria)**, an Agency of the Federal Government of Nigeria set up to accredit, regulate and monitor training activities in corporate and public institutions.

## Services: **Research & Analysis**

---

Sure, you are in it for the best possible data and appreciate the significance of the underlying choice design. And yes, it is essential to work with smart and pragmatic tools to play what-if games (with your client) and dig deeper.

But the proof of our pudding is most definitely in the eating. If we just tell you we excel in creating optimal choice designs by manually balancing researcher-, market- and respondent needs, would you pick up the phone?

Let's introduce you to our way of working, as this is what you will be experiencing on a daily project basis and makes you come back.

Yes, we are a team of quantitative marketing research consultants selling experiences besides facts and figures!

## Services: **Custom Software Development**

---

We carefully monitors the production of each application at all stages, making 100% sure that you and your customers get a really good product to enjoy.

When we develop custom software for our clients, we always start with the user's experience. Selecting from a wide range of standard programming platforms, we write easy-to-use programs that combine important processes and speed-up and simplify tedious tasks.

All the custom software we develop is designed to improve employee performance and productivity. And our clients are often surprised at how cost-effective it can be.

## Services: **Web Application Development**

---

EntriFlex's web application development practice addresses a wide range of business needs. We are experienced in the building of customized website modules, portals, CRM integrations and even complete stand-alone web-based applications.

Some of our web application project references are:

1. Thermocoolstore.com
2. Demegahub.com
3. NACASH.com

These are sophisticated web application, custom developed to meet clients' request.

## Services: **Mobile Application Development**

---

From Android to iOS, we have always been at the forefront in delivering exactly what the customers may look for when they have a requirement of any mobile application.

With our team's expertise in mobile application technology, our clients can turn their dream about mobile apps into reality. We focus on all essential and inseparable principles of mobile-app development which can make your mobile app look absolutely unique and very innovative.

## Services: Digital Marketing

---

The goal behind EntriFlex's digital marketing services are to put your company in a position to tap into the two-way conversation naturally happening between you and your customers.

Our services are designed to show you where people are talking about you, the areas where you can best get involved, and the tactics you should use to help increase brand awareness.

Through our social media audit, competitive analysis, and custom-built interactive strategies, we'll teach you how to take advantage of the social Web and how to successfully drive visitors to your site.

## Products: HSPC v4

---

HospiCarePro (now HSPC v4) was designed for any health institution that has the patient as centre of operation. It suitable for all sizes of healthcare providers; from clinics to multi-specialty hospitals, covering a wide range of hospital administration and management processes.

Healthcare practitioners, HMO's, statisticians and researchers are not left out; with well-built modules that converges all aspect of health management, processes and practices. Also, the government at a larger perspective.

HospiCarePro is an e-health application. That means, health information and record can be exchanged with other health providers and services, outside the domiciled HospiCarePro environment, in a secured and private connection.

It manages expanding caseloads, monitor delivery of care, and track patient, partners, and system outcomes. Hospitals can empower their people to be more proactive using HospiCarePro E-Health Application.
